

## Errata

### Possible role of fungi in negatively affecting fruit-set in avocados

T.V.Thomas, A. Eicker and P.J. Robbertse

*South African Journal of Botany*, 1994, Vol. 60(5), pp. 251–256

The following note was received from the authors:

Staff of the National Collection of Fungi, Biosystematics Division, Plant Protection Research Institute, Agricultural Research Council, Pretoria, brought the following nomenclatural errors under our attention. The authors are grateful for their help. The following corrections, mainly in author citations, are necessary:

**Inoculation** (p. 253):

*Nigrospora* state of *Khuskia oryzae* H.J.Huds.; *Fusarium oxysporum* Schlecht. emend. Syd. & Hans.; *Pithomyces graminicola* R.Y. Roy & B. Rai.; *Alternaria alternata* (Fr.) Keissl.; *Cladosporium cladosporioides* (Fresen.) G.A. de Vries

**Figure 5** (p. 255):

*Epicoccum nigrum*; *Cladosporium cladosporioides*

### Two new species of *Pelargonium* (Geraniaceae) from the Western Cape

Elizabeth M. Marais

*South African Journal of Botany*, 1994, Vol. 60(6), pp. 333–339

**Figures 1 and 3** (pp. 334 and 336):

Figures 1 and 3 were inadvertently switched during the production process. The captions are correct, but the illustrations should be interchanged. *Pelargonium curviandrum* has four stamens while *Pelargonium triandrum* has three. The two affected pages are provided as a loose-leaf insert in this issue of the journal, and should be pasted onto the existing pages.

The error is sincerely regretted and we wish to tender our apologies to the author for any inconvenience caused.
